(3) Five parties are held at a different CAP each week, consisting of a cook-out, beer and soda. Each CAP sends a man to the rear on a staggered schedule to allow him to relax and enjoy club, beach and USC facilities.
h. Career Planning. The career planning program continues to be stressed at all levels of command. USAF CLO testing is constantly being stressed to all personnel who have not completed high school. During November 1969 this command will send one Staff NCO to the Career Planners School in Okinawa.

i. Mail. Daily average bags of mail were processed as follows:

j. Promotions. 12 enlisted promotions were effected during the month of August 1969 as follows:

- Sergeant: 6
- Corporal: 2
- Lance Corporal: 0
- Private First Class: 4

k. Hospital Visits. Hospital visits are made daily by the Hospital Corpsman Representative, the Casualty NCO and the Mail Orderly who also delivers mail to the patients located in hospitals at Chu Lai. Frequent visits are made by the Commanding Officer, Executive Officer, the Adjutant, and the First Sergeant. Normally, the Commanding Officer or his representative, having been notified by Dustoff Control Chu Lai of the destination of the individual medevaced from the field, are waiting at the hospital when the casualty arrives. The dead are identified within hours of arrival at Chu Lai.
(1) The month began with a continuation of the previous month's lull in enemy-initiated activity. Once again, the majority of contact was centered around the Third Company's TAC in Quang Ngai Province. This month, however, the Third Company capitalized on the enemy's presence by leading the four companies in total kills for the month. The Second Company, in the area of Ly Tin District, conducted at least two productive ambushes that resulted in two VC KIA and one crew-served weapon captured. Although they received the least contact of all the CAP's, they continued to influence the people to support the SVN, and received one Chieu Hoi for their efforts. The majority of the kills were produced between the 13th and the 26th of the month, as the enemy attempted to use this period of negligible moonlight to conduct night activities. Third and Fourth companies received the largest amount of contact, and claimed 140 kills during the month.

(2) First Combined Action Company, the heaviest of contact in recent months, experienced fewer kills than in the past. During the month, they claimed 8 enemy kills and one individual weapon captured. Recently, the CAPs in the northwest portions of the TAC (including 1-1-4, 1-1-6, and 1-1-7) have been plagued by the presence of a large amount of mines and booby-traps. Precautions are being taken to mark the mined areas as well as collect and destroy the ordnance. The CAP suffered 7 Marines WIA and 5 FF soldiers WIA, as well as 3 FF soldiers killed, the majority of which were casualties of mines and booby-traps.

(3) The Second Combined Action Company continued in its role of security for the Ly Tin area. Enemy activity consisted of mortar attacks on the Ly Tin District headquarters. The mortars did slight damage to an Army vehicle. Other highpoints included two successful ambushes that resulted in 2 VC KIA and one crew-served weapon captured.

(4) The Third Combined Action Company, historically the center of contact in the Group, proved their worth on the 15th of the month, they killed 116 NVA soldiers in one night. The 5th Battalion, 21st Regiment, NVA infiltrated the village and attempted to eliminate the CAP 1-3-9. Their objective was to control the village of M Phong for two days. They were unsuccessful due to the determined efforts of the CAP. In the morning, an additional reaction force was sent from First CAS Headquarters that included the CO and S-3 Officer. Later that day, the CO was WIA, minor, and not evacuated. The results of the battle, from the CAP with the help of the support were 116 NVA KIA. In addition to destroying almost half of the village, the enemy killed a number of civilians. Activity during the remainder of the month was limited to harassment and attacks by fire.

(5) The Fourth Company had frequent contact throughout the month. CAP's 1-4-5 and 1-4-6 were confronted with the 48th BN. The company had 24 enemy kills, and collected 19 POW's. During one airstrike, members of the CAP
ton observed a vehicle attempting to avoid the bombs by racing for about 50 meters in the open from one trailer to another. This evasion proved effective, as the forward air controller failed to spot the vehicle. Although the CASO failed to produce its usual high number of Chieu Hais, the CAP was successful in the apprehension of 19 POWs.

(6) In retrospect, the month saw only one large ground attack, which was in the Binh Son area, at CAP L-3-9. The attack, as told by a POW taken from the action, was primarily for political reasons. First of all, it was to show the people of An Phong that the SVN is unable to protect them. The attack was timed to disrupt the elections which were slated for the following day. The idea was to hold the village for two days and then retire back into the mountains.

(7) With the First Company being harried by booby-traps, and the Second Company relatively quiet, the only other fighting occurred in the area northeast of Quang Ngai City, where the two new TACOs of the Fourth Company coincide with the reported location of the VC 48th BN. The future of the two new CAPs rests with their ability to force the 48th BN out of their TACO or destroy them completely. The presence of a vehicle in the hands of the 48th BN tends to demonstrate that they are well established and will be difficult to move out. Intelligence sources point to an increase in enemy activity in Quang Ngai for the coming month.
3. Operations
   a. General

   (a) During the reporting period the 1st Combined Action Group continued to conduct operations in accordance with its assigned mission of village/hamlet security and in support of the Accelerated Pacification Program (ACP). New areas were considered and evaluated for the possible relocation of certain CAP's that have experienced very little or no activity in their present areas for extended periods of time. The Accelerated Pacification Program appears to be moving ahead satisfactorily and the District Chiefs and Vietnamese forces are enthusiastic about the program and eager to contribute their share toward achieving the goals of the program.

   (2) The Americal Division continued to conduct operations throughout the Cau Hai area, ranging from squad sized operations. The Division continued to provide logistical support on a daily basis, with a few exceptions due to the inclement weather which prohibited helicopter resupply, in a satisfactory manner. The Division established a company in a role patterned after the CAI. 1st CAI provided liaison personnel to assist the infantry company in its initial operations with the Popular Forces in the villages. This move was in conjunction with the Accelerated Pacification Program.

   b. Activities

   (1) During the period the CAP's continued to conduct an increasing number of combined activities with the RF/XF forces. The 1st Company and the 4th Company lead the list with over twelve actions. The general attitude and aggressiveness of the Vietnamese forces is improving with few minor exceptions. The Americal Division continues to concentrate its efforts west of National Highway 1 with an occasional foray to the east of the highway and along the coastal area. Their activities to the west serve to intercept the large NVA units moving in from the west and allow the CAP's to concentrate their efforts against the VC and VCI.

   (2) CACO 1-1 experienced a moderately active month with twelve contacts and six sightings which netted eight VC killed, four VC apprehended and two Chieu Hoi's. The company commander submitted the request for the relocation of CAP 1-1-4. The District Chief of Tam Ky was very enthusiastic about the proposed CAC and earmarked Popular Force Platoon #143, recently graduated from the RF Training Center in Da Nang, to work with CAP 1-1-5 in the new area. The Company received an RVN interpreter, S/Sgt Do Ong on 30 September.

   (3) CACO 1-2 continued with very little contact in the Company's TAOC although indications are that the enemy is becoming more active than in the past. The VC have attempted to use propaganda teams, occasionally with loudspeakers, to enhance their rice procurement efforts in the District. The enemy also attempted to lay a minefield in CAP 1-2-4's TAOC but were driven off by the CAP. The District Headquarters received six (6) to eight (8) mortar rounds on 14 September which further emphasizes the uprising in enemy activity. The
assignment of a liaison officer from the proximate battalion (1/6) to the
District advisory staff has proven extremely helpful and greatly reduced
coordination problems. The increase in enemy activity in CACO 1-2's TAOE
resulted in two (2) enemy KIA for the period.

(4) During the reporting period CACO 1-3 came to the foreground with
the largest number of enemy kills as a result of the battle of An Phong (1)
on 13 September when the 6th Battalion, 21st Regiment NVA infiltrated the village
and attempted to annihilate the CAP and capture the village. Due to the sup-
port of the people in protecting the CAP Marines and the aggressive fighting
spirit of the Marines, the enemy failed and lost one hundred sixteen (116)
soldiers in the battle. CACO 1-3 continued to participate in numerous combined
operations with the Regional Forces in Binh Son District. One such operation
of particular note was one involving CAP's 1-3-1, 1-3-3 and 1-3-4 and an RF
Company in the vicinity of the Dong Le hamlets. The RF's were met with a heavy
volume of automatic weapons fire from the surrounding high ground. CAP 1-3-3
lost their corporal KIA during the one-day operation. The Dong Le's have
been targeted by the District Chief as an intensive pacification area and
plans are underway to relocate CAP 1-3-4 into that area. Indications are
that an increase in the enemy activity in CACO 1-3's area is forthcoming.

(5) CACO 1-4 experienced a moderate amount of activity with CAP's
1-4-1, 1-4-5 and 1-4-6 providing the bulk of the contacts and sightings. The
enemy continues to maintain sizeable forces in the area north, northwest of
CAP 1-4-5 and 1-4-6. CACO 1-4 participated in a total of twenty-seven (27)
combined operations, most of which were to protect the rice harvesting opera-
tions of the villagers. Indications are that CACO 1-4 can expect and increase
in enemy activity along with CACO 1-3.

c. Training

(1) General. The formal training covered the subjects of General Military Subjects, Leadership, Small Unit Tactics, Infantry Weapons and Supporting Arms. Arrangements are being made with 1st BN, 11th Arty, USA to provide FO instruction to each CAP. This instruction is designed to augment the information on FO procedures and techniques given at CAP School and at the Americal Division Arty Course.

(2) CAP Training. The individual CAP's conducted daily classes as prescribed by the Group training schedule which is promulgated each week for the coming week. Each CAP Leader returns the schedule at the completion of the weeks training and indicates the number of hours accomplished. Thirty six hours of scheduled training was completed by each CAP. This formal training was augmented by many hours of impromptu instruction given by members of the CAP when the need or opportunity arose.

(3) Other Training

(a) Six Marines completed the Vietnamese Language Course in Da Nang.

(b) Three Marines attended the Artillery FO School conducted by the Americal Division.

(c) A one day indoctrination course was conducted for all newly joined personnel prior to their assignment to the field.

d. Inspections. Each CACO and CAP was inspected by a representative from the S-3 Section during the month. Particular emphasis was given to the condition of crew served and individual weapons and individual equipment. No significant discrepancies were noted.

(1) The S-3 Section continued the practice of taking prospective CAP leaders on as many inspection trips as possible prior to their being assigned to the field. This enabled the new leaders to meet and talk with seasoned CAP leaders and become aware of the various problems that are common to many CAP's and the solutions that have been tried and proven in the field.

e. Fire Support. The USA artillery units supporting the Americal Division continued to provide excellent fire support during the reporting period. Due to the increase in enemy activity the number of fire missions called increased and, with few exceptions the time per mission was reduced as more missions were fired at the clearance procedures exercised. The 1st BN, 11th Arty continued to provide outstanding support to the CAP's of CACO 1-3 and CACO 1-4. The desire

II-8

UNCLASSIFIED
of 1/4 to provide more and faster fire support has greatly improved the effectiveness of the artillery support.

f. Air Support

(1) Tactical air support was utilized fourteen times during the month; this included fixed wing strikes, helicopter gunship strikes, Spooky and Shadow gunships and flareships as well as visual reconnaissance missions.

(2) The aforementioned figure does not include the missions flown for logistical resupply of the CAF's as this time is allotted by the probate battalion on a daily basis and these missions are not requested or controlled by the CAG.

g. Scout Dog Teams - During the month Scout Dog Teams were available to two of the companies. The teams work well with most CAF's and serve to boost morale and confidence of the Marines and PF's alike.

h. Psychological Operations

(1) Friendly Operations. During the month, the 1st CAG in conjunction with and supported by the Americal Division, distributed over nine and one half million leaflets; in addition, over eighteen (18) hours of aerial broadcasts were utilized to propound the Chieu Hoi program and Pro-GVN ideals. The PayOps broadcasts may be taking effect as there were many more Chieu Hoi's this month than in the past. A total of fourteen (14) VC/NVA Chieu Hoi'd as compared to three (3) for the preceding month.

(2) Enemy PayOps consisted of leaflets and on two occasions loudspeaker broadcasts. The enemy still has difficulty in reaching the sector of the population that would benefit him the most as the US and GVN forces control heavily populated and rice rich areas and he is unable to utilize his PayOps capability to the fullest.

i. Kit Carson Scouts. The KCS continue to contribute to the effectiveness of the CAF's. In answer to an inquiry by the 1st MarDiv as to whether or not the CAG would be desirous of additional KCS's, the 1st CAG replied affirmative, that one (1) KCS per CAT would be ideal, to date no further word has been received from the 1st Div.

j. Volunteer Informant Program. 10,800 JVN were spent during the month under the VIP program. The total amount was approximately less than the previous month in keeping with the reduction of total funds available from III MAF. The Group was notified of a slight increase in the total funds available consequently the expenditures will probably increase somewhat with a slight degree of encouragement from the CAF's for the people to bring in more ordnance.

k. Communications

(1) Operations. During the reporting period communications between Group Headquarters and CACO Headquarters were generally satisfactory. Be-
between each CACO and their respective CAP's communication problems exist, in some cases, due to extended distances between CAP and CACO which sometimes is beyond the operational capability of the Radio Set AN/PRC-25. This problem has been minimized insofar as practicable, in consideration of the tactical situation, through extensive use of Ground Plane Antenna RC-292 placed at strategic (from a communication standpoint) sites within the CACO area of operations. These antennas have the characteristic of extending the transmit/receive distance of the Radio Set AN/PRC-25, and are used for relaying transmissions to and from CAP's beyond the normal range of organic whip and tape antennas.

(2) Personnel. One Group Headquarters radio operator was transferred to CACO 1-3 during the reporting period while another had terminated his overseas tour and was rotated to CONUS. This necessitated bringing two radio operators in from the CACO's. One was transferred from CACO 1-3 and one from CACO 1-4. The Group Headquarters radio watch consists of a three section watch, which is adequate for present operations.

(3) Maintenance Support

(a) Second Echelon. Due to lack of adequate support by FLISG-A and of the Direct Exchange Program, it became necessary to make liaison with the Radio Repair Section, NAS-12, NAS-12 for the purpose of establishing a reliable 2nd Echelon Radio Repair. Since then they have been exceptionally cooperative in performing repair work, even to the point of replacing parts from their own stock, although they are in short supply. In-shop time for repair orders has averaged about 25 days.

(b) Third Echelon. During the reporting period, support by the Direct Exchange Program has been generally unsatisfactory. Equipment turnaround in the past has been excessive, and it has continued with little noticeable improvement. Radio equipment, particularly FT-505/PRC-25, on deadlineline in excess of 40-60 days is not unusual and indeed is probably the rule rather than the exception. At the present time the 1st CAG has a total of 11 AN/PRC-25 on deadline, four of which are in excess of 50 days on deadline. The rest range from one week to over one month.

* Includes six (6) not 2nd Echelon repairable, transferred to 3rd Echelon.
** Includes two (2) Code H (beyond economical repair).
4. **S-4/Supply**
   
a. **Significant Events**
   
   (1) Combat losses during the month were one M-60 machine gun, one M-79 grenade launcher, and three M-16 rifles.
   
b. **Supply**
   
   (1) Supply support from FLC during September continued to be excellent. Material receipts as a result of weekly convoys enables the Group to reduce actual leadtime. With the pending monsoon season the convoys will probably be stopped and could reduce the supply capability if receipts from the system are not timely.
   
   (2) T/E deficiencies continue to effect the overall readiness, however, the combat mission has not been impaired. Receipt of one ML51 truck, 1/2 ton, has given some relief to the T/E asset posture.
   
   (3) Increased input of personnel beyond T/O has decreased assets of organizational clothing and equipment, and in some cases, an NIS position has been realized.
   
c. **Maintenance**
   
   (1) Turn-around time of deadline communications equipment continues to be a problem. The RT-505 and H-189, handset, being deadline in excess of 30 days is of concern. It is anticipated that in October communication maintenance support should improve with the receipt of repair van and modules, parts, etc., at Sub Unit #1, FLSG-A, Chu Lai.
   
d. **Motor Transport**
   
   (1) During the reporting period Group Motor Transport logged 23, 412 miles.
   
   (2) 9th Engineers began construction of a grease rack at the Motor Pool.
   
e. **Miscellaneous**
   
   (1) Public Works Chu Lai started renovation of the quonset huts which will serve as the new Group CP.
   
f. **Medical.** The following information was received during the Senior Corpsman's meeting held at the Combined Action Program Headquarters on 24 September 1969.
   
   (1) All corpsmen are to be on the alert for hepatitis and hemorrhagic fever. A bulletin has been sent to all corpsmen concerning this problem.
(2) Other topics discussed were: Navy personnel, naval administration, immunization reports from III MAF Transient Facility, disease incidents within the Combined Action Program, Combined Action Program School first aid training, Combined Action Program School Hospitalman training curriculum, a review in regards to Food Service Personnel, physical examinations, and wet weather (monsoon season) medical problems.

(3) Techniques

(a) During the month of September the Group Aid Station instituted a quarterly inoculation program within the entire 1st Combined Action Group. This program will continue into the month of October.

(b) The senior medical representative visited ten CAGs during the month. During these visits sanitation inspections were conducted and daily MEDCAPS were observed within each platoon visited. Sanitation in the villages continues to be stressed.

(c) Weekly sanitation inspections continue to be conducted in the Group Headquarters. All problem areas have been noted, and corrective action initiated.

(d) Medcaps conducted
