PART II
NARRATIVE SUMMARY
COMMAND, OPERATIONS AND TRAINING

The month of January was devoted to normal operations in established Tactical Areas of Coordination.

Night operations continued to dominate the tactical scene. Patrols throughout each TAOC and ambushes along suspected VC/NVA routes of communication were conducted daily by platoons. All activities were totally integrated with approximately two Popular Force (PF) soldiers for each Marine taking part.

The PF desire for a large command post continued to detract from the night activities as personnel shortages limit the number of PF Soldiers available for patrols and ambushes. This condition is prevalent primarily with CAPs located in Dong Ha and Hai Linh Districts. On the job training of Popular Force soldiers continues to receive major emphasis.

During January, 4th CAG commenced a Marksmanship Program and immediate action drills to prepare the individual Marine and PF for sudden encounters with the enemy. Experience dictates that contacts in nearly all cases are sudden, short and often so unexpected that the opportunity to inflict casualties is lost if the patrol leader has to give orders at the time of the encounter. For this reason the CAG is stressing immediate action drills based on principles of simplicity, aggressiveness and speed.

Twice each week, on Tuesday and Friday, a CAP is removed from its AO and brought to the 4th CAG compound. During the afternoon classes are conducted for Marines and PFs alike demonstrating the correct handling of weapons and ensuring that each man understands and remembers the capabilities and limitations of his weapon.

After a hot meal in the compound the CAP moves to the range where he zeroes his weapon by triangulation. Each member of the CAP then walks through a short course where he is required to fire upon sighting the target, turning to his flank and firing from the shoulder, hip and stomach. After completing this course CAPs are organized into squads and upon command take under fire enemy troops in a bunker, in a column and in a skirmish line.

After accomplishing this training during daylight hours, the same courses are traversed during the hours of darkness. The CAP is billeted at the CAG compound overnight and after a warm breakfast and inspections is returned to the AO. In addition an armorer was present to inspect all weapons for serviceability prior to firing on the range. Other formal training during the month included psychological operations, medevac procedures, map reading and compass, ambush techniques and intelligence.
Instruction on radio procedure was also provided. These classes are scheduled on a regular monthly training syllabus and are conducted by the training NCO. Classes on communications are presented by the Communication Section.

Enemy activity increased significantly in Quang Tri Province during the month of January. Numerous indications pointed to a general enemy offensive in the near future. Increased activity included reconnaissance of possible objectives for an offensive, heavy rice and food collection in Mai Linh and Hai Lang districts bordering on the piedmont and jungle areas of the province, increased terrorism against GVN supporters and propaganda and proselyting activities throughout the eastern portion of the province.

Both confirmed and unconfirmed reports during the month showed a marked increase in the Viet Cong Infrastructure's attempts to reorganize in Trieu Phong District with possible reinforcements trained and equipped by the NVA in the Hai Lang Forest, southwest of Quang Tri City.

The North Vietnamese Army continued reinforcing units already in the province with personnel and weapons. It is believed, however, the only source of food supplies available to Seventh Front units in the south central portion of the province is by buying or stealing from the indigenous people in the lowlands. Thus with heavy anti-rice collection operations and interdiction of supply and communication-liaison routes it is believed NVA and Main Force units are suffering from lack of food supplies thus cutting unit combat effectiveness.

ADMINISTRATIVE ASSISTANCE

Most of the Marines assigned to the Group S-1 office are relatively inexperienced in handling administrative duties of the Marine Corps. Every effort is being made to develop these Marines to an acceptable level of proficiency.
MORALE AND WELFARE

The morale of the unit continues to be excellent. There are recreational facilities available for all hands. Quotas for both in-country and out of country Rest and Recuperation (R&R) are effectively being utilized. Eleven out of country quotas were allocated from III MAF and utilized by the Group.

MAIL

Mail is processed and expeditiously delivered as quickly as operational requirements permit. Daily average of mail processed was as follows:

CONPRINTS/SPLINTS/WELREP

This command received one congressional interest, and no special interests during the month. Three (3) welfare reports were processed which answered concerned parents regarding the lack of correspondence and the present state of health of their sons.

SPECIAL SERVICES

During the month the special services program continues with the acquisition of items for Marines and Corpsmen of the Command. The following items were dispensed throughout the command. Fifty decks of playing cards, 40 sweat shirts, 5 pairs of tennis shoes, 190 pairs of tiger shorts, 2 footballs, and 1 set of horse shoes. Beer and soda continue as items of resupply for the field troops.

HOSPITAL AND BRIG VISITS

Weekly hospital visits were made by an officer of the command, and daily visits were made by a medical department representative. No welfare or other problems were uncovered. The Command has one man confined who was visited by an officer of this command.
During the month of January 17,507 Vietnamese civilians were treated by MED CAF. The number of Vietnamese treated per day remained stable and produced excellent results in the overall pacification program.

CAF 4-1-4 diagnosed a case of plague in the Kim Lai area. Immediate measures were taken by MILFAP to control the disease.

CAF corpsmen continue to devote numerous hours to train Vietnamese Health Workers and LF corpsmen with good results.

Patients seen at BAE numbered 231. A breakdown and classification of patients treated are as follows:

a. Upper Respiration Infection..................08
b. Skin Disease.................................12
c. Diarrhea....................................10
d. Fever of Undetermined Origin.................02
e. Injuries: Hostile.............................04
f. Injuries: Nonhostile..........................06
g. Venereal Disease.............................02
h. Other........................................156
i. Dental........................................31
LOGISTICS

During the month of January a continuing effort was devoted to improving the facilities, grounds and the logistical support of the Fourth Combined Action Group. Particular emphasis was placed on construction of a nine man shower for the enlisted personnel in this unit. Renovation of the Staff shower was also completed. A two inch water line was laid to the Messhall and Staff quarters providing these areas with running water.

During the first part of the month, difficulty in resupplying the CAGs was encountered by the CAGO supply personnel. This was caused by adverse road conditions and flooding by heavy rain throughout the province.

Five amphibious cargo carriers that were authorized this organization were received during January. During the month, a 1/4 ton M151A1 was rated code H and turned into Force Logistic Command, Da Nang.

This command still continues to operate on a 60 KW Generator which is on a temporary loan from a local Naval Construction Battalion. This organization continues to be in critical need of an additional FU-718 30 KW Generator which is to be forced from the Force Logistic Command, Da Nang when it becomes available.

The Fiscal Section shows an authorization of $225,800.00. During the month of January, $22,705.53 was obligated, bringing the total obligation of the first seven months of Fiscal Year 1970 to $172,172.53 with an available balance of $53,647.47.

The Motor Transport Section logged 19,037 miles during the month of January. No accidents occurred during the same period.
Civic action activities of the Group during the month of January were concerned primarily with the MEDCAP program and medical assistance in CAP areas. 17,507 persons received medical treatment; 4 received dental treatment; 12 adults and 7 children were evacuated to 18th Surgical and Quang Tri Provincial Hospital for more extensive care. During the month, VN health workers received 47 hours of training while assisting CAP corpsmen. CAP corpsmen also held 54 personal hygiene/sanitation classes with 398 in attendance.

CAP units were active in distributing commodities and CAP Marines gave out 1800 lbs of food. Also distributed were 75 lbs of soap, 200 school kits and vegetable seeds supplied by CORDS.

CAP relocations have left two more dispensaries in the hands of the Vietnamese, one at Phuong Lang Dong and the other at An Tho. Current lack of construction materials precludes the possibility of any further MEDCAP dispensary construction, and it is expected that this will gradually reduce overall MEDCAP efficiency.

The educational effort involved most CAP units and their Marine civic action NCOs. Distribution of school kits, English-Vietnamese language texts (Vol I & II) to teachers, along with chalk and occasionally blackboards, paint and cement for school repair, accounts for a large proportion of CAP civic action. Several CAP units give or assist in English language classes, and during January 36 classes with 289 attendance were recorded. Combined Action Platoons also assisted 12 dispensaries and hospitals, 1 orphanage, 2 religious institutions and 5 schools during the reporting period.

Construction projects during the month included installation of a well pump at Trieu Phong District Headquarters (CACO 4-3) by the CACO Headquarters section. CAP 4-3-1 assisted the farmers in Van Pho with their gardens and distributed vegetable seeds. CAP 4-3-3 in Bich La Dong was extremely active and helped the Vietnamese to fill in a ditch, build a fence, build a store, paint the hamlet archway (CAP supplied paint) and repair a small bridge. CAP 4-3-7 helped repair a house and a pagoda in their AO. CAP 4-2-2 and CAP 4-2-4 in Hai Long District helped Thi Ong hamlet (4-2-2) repair their school. The villagers began with materials supplied by district and requested CAP aid for the remainder. Cement, a blackboard and school supplies were donated by the CAP. CAP 4-2-2 and 4-2-4 also repaired two boats they use constantly to cross the Vinh-Binh canal in their area. In Dong Ha District (CACO 4-1), CAP 4-1-5 helped repair the road into the hamlet; and CAP 4-1-4 repaired a house. Civic action programs saw a total of 410 man-days provided by USMC/USA/PPF personnel on economic development, education, social welfare (MEDCAP), transportation and refugee assistance. (Rinderpest) reached epidemic proportion in most CAP AOs during January. Hai Long has had the fewest cases, but Hai Linh, Trieu Phong, and Dong Ha Districts have had several hundred cattle and water buffalo die. CAPS have been extremely cooperative in acting as monitors and as liaison between CORDS teams and the ARVN and GVN medical teams which are presently inoculating cattle in large areas in Hai Long District in order to stop the southward spread of the disease into Thua Thien Province.
PART III

SEQUENTIAL LISTING OF SIGNIFICANT EVENTS

The following is a summary of significant events taking place in 4th CAG during the month of January 1970. Part IV, Supporting Documents, contains a verbatim copy of all spot reports submitted during the period.

14 Jan 70. CAP 4-3-1 on day patrol in Phu-Ang Hamlet discovered 40 bags of rice, totalling 750 lbs, in the house of PHAM THI THUYET, age 20. Patrol was questioning residents in area concerning an RPG sight which was found in a house next door the day before, when the rice was found. The rice was confiscated by Vietnamese officials and VCO was turned over to District Intelligence Chief.

23 Jan 70. LtGen H. J. NICKERSON, CG III MAF and LtGen M. ZAIS, CG XXIV Corps visited 4th CAG Headquarters. An update briefing was given by the commanding officer, 4th CAG.

26 Jan 70. NGUYEN DANG KET, CAP PF on patrol with CAP 4-2-4 found a metal ammo box laying in the sand. Booby trapped ammo box exploded when the cover was opened, seriously injuring the victim.

31 Jan 70. CAPs 4-2-3, 4-2-5 and 4-2-6 were relocated to new areas of operation. A copy of relocation proposal is contained in Part IV, Supporting Documents. The relocations have not yet received final approval from CG, III MAF and CG, I Corps; therefore, these moves are considered tentative. The relocation was a part of operation "Clipper Ship," conceived by the 1st Brigade 5th Infantry Division (Mech) to curtail expected pre-TET VC movement through the My Chanh area into northern Hai Lang District and other coastal areas. One battalion combined with one company of RF, occupied the exterior southwest ofQL 1 while CAPs 4-2-3, 4-2-5 and 4-2-6 provided interior screening along QL 1.
